SUMMARY

Software Engineer with nearly 3 years of experience building healthcare systems, SaaS platforms, AI products, and cloud-native applications. Strong expertise in Python, FastAPI, React.js, Next.js, TypeScript, PostgreSQL, Docker, Kubernetes, microservices, RAG, vector search, and system design. Experienced in building production-grade APIs, full-stack platforms, and scalable applications from development to deployment.

EDUCATION

Lakireddy Balireddy College of Engineering

B.Tech, Electrical and Electronics Engineering

2024

AANM & VVRSR Polytechnic

Diploma, Electrical and Electronics Engineering

2021

EXPERIENCE

Software Engineer

Dec 2024 – Jun 2026

RAILTEL CORPORATION OF INDIA LIMITED

- Led a 4-member engineering team within a 10-member division delivering enterprise healthcare, government, and internal operations platforms.
- Designed and developed scalable full-stack applications using FastAPI, React.js, Next.js, PostgreSQL, Redis, Docker, and Kubernetes.
- Developed Healthcare Information System modules supporting patient registration, hospital workflows, ABDM integration, and FHIR-based healthcare interoperability.
- Built AI-powered HMIS Helpdesk using RAG, embeddings, vector search, reranking, and LLM integration for document, CSV, website, and video-based knowledge retrieval.
- Created centralized ID Card Management System with role-based approvals, employee verification, QR-code generation, and administrative dashboards.
- Built RailTel e-Office Support & Ticketing Platform with real-time ticket handling, user management, workflow automation, and Android app support using Kotlin.
- Implemented backend APIs, authentication flows, role-based access control, CI/CD automation, deployment workflows, monitoring, and production support.
- Participated in architecture discussions, infrastructure planning, code reviews, sprint planning, and stakeholder communication.

Associate Software Engineer

Jan 2024 – Dec 2024

SRININE TECHNOLOGIES PRIVATE LIMITED

- Developed enterprise SaaS applications using React.js, TypeScript, Tailwind CSS, ShadCN UI, React Hook Form, and WebSocket-based communication.
- Owned approximately 90% frontend implementation for CPD API Server Platform, including ticketing, notifications, KYC workflows, provider configuration, API pricing, service logs, and security dashboards.
- Contributed more than 60% frontend implementation for CPD API Client Platform, including merchant management, multi-role access, live chat, notifications, provider priority, and user workflow modules.
- Built responsive and maintainable UI components for Super Admin, Admin, Merchant, Retailer, and Sub-Retailer workflows.
- Collaborated with backend, QA, and product teams to deliver scalable customer-facing platforms with improved usability and frontend architecture.

PROJECTS

CORTEXVIA – AI KNOWLEDGE PLATFORM | Founder & Lead Engineer

- Built a production-ready AI knowledge platform enabling businesses to create intelligent website chatbots from PDFs, documents, websites, YouTube videos, FAQs, and custom knowledge sources.
- Designed ingestion pipelines, document chunking, embedding generation, vector storage, semantic search, reranking, chatbot SDK, API key management, analytics dashboards, and usage tracking.
- Implemented SmartRAG, LightRAG, GraphRAG, multi-model inference routing, streaming AI responses, and source-aware answer generation.
- Developed scalable backend and frontend architecture using FastAPI, React.js, PostgreSQL, MongoDB, Redis, Docker, and cloud infrastructure.
- Led product architecture, backend engineering, AI integration, DevOps, deployment planning, and open-source development.

MS COLLECTION – FULL STACK E-COMMERCE PLATFORM

- Developed a production-ready e-commerce platform for fashion accessories and jewelry with catalog management, product filtering, wishlists, shopping bag, checkout, order tracking, and admin operations.
- Implemented Google OAuth, secure sessions, customer profiles, Razorpay payments, COD workflow, payment verification, shipping logic, and inventory management.
- Built product, category, image, attribute, order, and customer-support modules using React.js, TypeScript, FastAPI, PostgreSQL, Redis, Docker, and Tailwind CSS.

EMAIL SENDER LIBRARY

- Published reusable email libraries across Pub.dev, PyPI, and NPM with 1,500+ weekly downloads.
- Built SDKs and APIs for SMTP delivery, templating, authentication, and developer productivity across Flutter, Python, and JavaScript.

EMBEDRANK – EMBEDDING & RERANKING ENGINE

- Built embedding and reranking services for semantic search, RAG pipelines, document retrieval, and enterprise AI workloads.
- Implemented batching, vector retrieval, reranking workflows, FastAPI microservices, and self-managed deployment infrastructure.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, Kotlin, Dart, C++

Frontend: React.js, Next.js, Tailwind CSS, ShadCN UI, TanStack Query, React Hook Form

Backend: FastAPI, NestJS, Spring Boot, Node.js, Django REST Framework, REST APIs

Databases: PostgreSQL, MongoDB, Redis, pgvector

DevOps & Infrastructure: Docker, Kubernetes, Linux, Kafka, ELK Stack, Grafana, GitHub Actions, CI/CD, Nginx

AI & Search: RAG, GraphRAG, SmartRAG, LangChain, Embeddings, Vector Databases, Semantic Search, Reranking, LLM Integration, Hugging Face

Healthcare: ABDM, FHIR, Healthcare Interoperability, HMIS, Patient Registration

CERTIFICATIONS

HackerRank Python Certification

Cyber Security Certification – RailTel Corporation of India
